

JavaScript & Playwright Interview Questions with Coding Problems

This document includes both theoretical interview questions and practical coding/scenario-based problems commonly asked for JavaScript and Playwright automation tester roles.

JavaScript Theory Questions

1. What is the difference between var, let, and const?
2. Explain primitive and non-primitive data types.
3. What is hoisting in JavaScript?
4. What is the difference between == and ===?
5. What are mutable and immutable data types?
6. Explain callback functions and arrow functions.
7. What is scope in JavaScript?
8. Difference between null and undefined?
9. What is closure in JavaScript?
10. Explain synchronous vs asynchronous execution.

JavaScript Coding Problems

1. Write a program to reverse a string.
2. Write a program to remove duplicates from an array.
3. Find the largest number in an array.
4. Find the count of vowels in a string.
5. Sort an array without using built-in sort().
6. Write a program to check palindrome.
7. Write a function using map() to double all numbers.
8. Use filter() to find even numbers from array.
9. Use find() to get first number greater than 10.
10. Write a program to swap two numbers.

11. Write a function to capitalize first letter of each word.
12. Find second largest number in an array.
13. Write a program to flatten nested arrays.
14. Write a function to count occurrences of characters in string.
15. Difference between `forEach()` and `map()` with examples.

String & Array Method Questions

1. Explain `includes()`, `split()`, `trim()`, and `substring()`.
2. What is `replace()` method?
3. Explain `startsWith()` and `endsWith()`.
4. What is `search()` method?
5. Difference between `find()` and `includes()`.
6. Explain `push()`, `pop()`, `shift()`, and `unshift()`.
7. What is `join()` method?
8. Explain `sort()` and `reverse()`.
9. How does `filter()` work internally?
10. Explain predicate functions.

Playwright Theory Questions

1. What is Playwright?
2. Why Playwright over Selenium?
3. Explain Playwright architecture.
4. What are locators in Playwright?
5. Difference between `locator()`, `getByRole()`, and `getByText()`.
6. What is auto-waiting?
7. How do you handle frames and windows?
8. What is Page Object Model?
9. How do you capture screenshots?
10. How do you generate reports in Playwright?

Playwright Coding & Scenario Problems

1. Write Playwright script for login functionality.
2. Automate dropdown selection in Playwright.
3. Write script to handle multiple browser tabs.
4. Capture screenshot when test fails.
5. Validate page title and URL.
6. Write locator strategies for dynamic elements.
7. Automate file upload scenario.
8. Handle alerts and popups.
9. Write API validation using Playwright request.
10. Implement Page Object Model structure.
11. Run tests in parallel execution.
12. Retry failed tests using configuration.
13. Handle flaky tests in Playwright.
14. Automate table validation scenario.
15. Write script to extract all links from webpage.

Real-Time Interview Scenarios

1. Button is visible but click is failing. How will you debug?
2. How do you automate OTP login?
3. How do you handle dynamic XPath issues?
4. How do you manage test data in framework?
5. How do you integrate Playwright in Jenkins/GitHub Actions?
6. How do you perform cross-browser testing?
7. How do you reduce flaky tests?
8. How do you design reusable automation framework?
9. How do you validate downloaded files?
10. How do you debug failing CI pipeline tests?
